

Quick Dry Foam

It is only recommended to use a premium outdoor fabric shell like Sunbrella!" with a quick drain mesh on the back cover, which allows water during rain to flow through the foam. This allows the foam to dry quickly with little maintenance.

Follow the instruction on the care label

Should a spill occur rinse with cold water. Do not use any detergents or chlorine bleached cleaning products. Dry in the shade until fully dry. Do not machine wash or tumble dry.

Fabric Covers

The Sunbrella™ fabric is worry free for many years, Should a spill occur please follow the manufacturers cleaning instructions found on the care label in the inside seam of the cover.
